Class 706.—Equipment, materials, processes, and products used in the treatment of the ores of iron, manganese, chromium, nickel, and other metals used in the manufactures of iron alloys and special steels. Equipment for smelting; blast furnaces and accessories; iron foundries, cupolas, blowers, &c. Production and varieties of pig iron and iron castings, malleable cast iron, ferromanganese and manganese castings, and castings of other iron alloys, and the metals used in these alloys.

1. Ateliers de construction de la Meuse, Co. Ltd., Sclessin.
   Plans and designs. (See class 141.)
2. Forges, fonderies et laminoirs du Marais, Co. Ltd., Montigny-s/Sambre.
   Specialty of iron of first quality, merchant and figured iron.—Foundry and special works for cylinders and rolling mills equipment.—Various mechanical pieces.
   Notices.
3. Hauts fourneaux & aciéries d'Athus, Co. Ltd., Athus.
   Refined white cast-iron, refined grey pig-iron, refined of spotted cast-iron, foundry cast-iron No. 1 to 7, O. M. Thomas cast-iron.
   Id. (See class 707.)
4. Laminoirs de Monceau, Liége.
   Works at Tilff. Fine, ordinary and polished sheet-iron.—Fine sheet-iron for chasing and fabrication of household ustensils in enamelled and plated iron.—Speciality of polished sheet-iron for rich fancy stoves.—Speciality of sheet-iron for dynamo-inductors, alternators, reduced graduated transformers of hysteresis and of perfect electrical permeability.
5. Laminoirs, hauts fourneaux, forges, fonderies et usines de la Providence, Co. Ltd., Marchienne-au-Pont. Works : Marchienne-au-Pont, Hautmont, Rehon.
   Distinctions : Paris, 1849, Silver medal; Paris, 1855, 1st class medal; Paris, 1867, Golden medal; Paris, 1878, out of competition; Amsterdam, 1883, Diploma of honour; Antwerp, 1885, Diploma of honour; Paris, 1889, Great prize; Bordeaux, 1895, Great Prize; Paris, 1900, Member of the Jury.

   Eighteen skull mouldings of the paleolithic age, the neolithic age, the age of German invasions and the present age.
   The two skulls of Spy represent the paleolothic age; they are the most complete and most authentic skulls of the quaternary age. The farfamed skull discovered by Schmerling in Engis is really of the neolithic age, although it was considered at first as quaternary; it belongs to the Cro-magnon type. The three original skulls are in the University of Liége and the mouldings are exhibited by Mr. J. Fraipont.
   The fifteen other skulls are exhibited by Dr. Houzé. They form a collection of twelve neolithic skulls of the valley of the Meuse and of its affluents. (Furfooz, Chauvaux, Marche-les-Dames, Sclaigneaux, Falmignoul and Hastière.) Three skulls represent the age of German invasions, the walloon type and the flemish type. This collection composed by Dr. Houzé, summarizes the ethnic craniology of Belgium.

KINGDOM OF BELGIUM

NATIONAL INDEPENDENCE

75th ANNIVERSARY CELEBRATION

World's fair and international Exhibition of Liége, 1905

In 1880 Belgium has celebrated the 50th anniversary of its independence by organizing a national Exhibition that was as a revealer of its commercial and industrial development.

Since then, it has organized several exhibitions that had ever more importance and success of which was growing.

In order to commemorate the 75th anniversary of its independence, it invites again all nations to encounter on its hospitable and neutral soil in this pacific fight which is named an exhibition and the main point of which is to group the products of the improvements obtained in all branches of human activity.

It consequently organizes a new World's fair and international Exhibition that will cover an area of about 700,000 square meters.

After having successively chosen, for the previous exhibitions, Brussels, seat of the Government, and Antwerp, commercial metropolis, Belgium has cast its eyes on Liége, industrial capital, for the exhibition 1905.

*
* *

Liége, whose fame has, this great while, crossed the borders of our country, is a commercial place of first class and equally a centre of an extraordinary activity, owing to its numerous and powerful collieries, blast-furnaces, iron, steel and braces foundries, arms manufacturies famous in whole world, its glass-works, cycles and automobils manufactures, &c.

Geographically speaking, Liége is situated not far from the frontiers of Germany and Netherlands; it is only five hours railway distant from Paris and nine hours from London. All express trains which unite the ultramarine countries with the utmost points of Europa and even of Asia, cross it and stop in its stations.

The Exhibition is principally devoted to works of art, scientifical designs, engineering constructions, products of

the industry of all countries. It will comprise, besides this, an Ancient Art Exhibition, an Army Exhibition and a Colonies Exhibition.

International Congresses, Lectures, arts and sports festivals, and competitions of all kinds are to be organized. Among these, we can make mention of a sensational competition for directed balloons. Numerous and various attractions are equally to be provided.

*
* *

Exhibitions are not only organized in order to draw the crowd in a certain town. They have an higher object and a more useful efficiency : as above mentioned, they are organized with a view to group the improvements obtained in all branches of human activity, to incite productors to Search again, to Search incessantly after new improvements.

But, if productors take on themselves the burden of the considerable expenses necessitated by an exhibition, it is to be understood that this must afford them great advantages.

In that light equally, the Exhibition of Liége is in a good place for drawing all productors. Belgium, indeed, carries on business with all nations and, consequently it is of the interest of all nations to maintain in this country their mercantile connections, to increase themselves, and, for this, the Exhibition affords them an exceptional chance of showing off their products.

A commercial office, established in the Exhibition Buildings, will supply gratis to visitors all useful particulars on

exhibited products and productors; it will distribute, on account of the Exhibitors, whatever circulars and prospectus.

In order to recapitulate the great advantages to be afforded by this Exhibition, we can remind that general trade of Belgium with other countries has in 1901 amounted to more than seven thousand millions francs.
